

Stilts: adapt the gait to a changed body

01 Input

2 cm extensions; blend 0; 0.014 kg per foot; command 0.25 m/s

02 Acquire

Fresh PPO base: 6,000,640 environment transitions

03 Refine

Resume actor + normalizers; strengthen angular tracking

04 Evaluate

10 seconds; signed progress; alternating contacts; upright

05 Output

Selected continuation + morphology-specific ONNX and MP4

All measured outcomes are nominal simulation evidence; proposed extensions are untested.
