

One Swing refinement, three counters

01 One rollout

16 environments $\times$ 256 steps = 4096 new transitions

02 Whole PPO phase

128 rollouts $\times$ 4096 = 524,288 new transitions

03 Optimizer work

128 rollouts $\times$ 2 epochs $\times$ 4 minibatches = 1024 updates

04 Sample reuse

524,288 transitions $\times$ 2 epochs = 1,048,576 presentations

05 Separate acquisition ledger

38,400 teacher labels at selected DAgger stage 3; PPO steps = 0

Counters are not interchangeable. Earlier failed runs and evaluations are excluded.
